MORE THAN SIRENS
RECEIVE AND RESPOND

ALARM MONITORING

TOTAL SECURITY SERVICES THAT REVOLVE
AROUND YOU, YOUR FAMILY AND YOUR
ASSETS.

Today, electronic alarm systems are a vital investment
in protecting families, property and possessions.

This investment can do more for you than ring bells
or sirens which, by law, must shut down after five
minutes.

The Central Monitoring Station can look
after your system 24 hours a day, every day.

THE CENTRAL MONITORING STATION

The Central Monitoring Station is fully protected
and backed up against hardware failure and the
station itself is constructed and fitted out to comply
with Australian Standards AS2201.

The Central Monitoring station operators are
highly trained and licensed professionals who are
committed to excellence in service.

Our business is dedicated to providing the
best possible service to our customers.

You can rest assured that the Central Monitoring station
has taken the appropriate action within seconds of receiving an
alarm message from your alarm system.

Our operators will immediately contact you and if appropriate
can despatch police, fire brigade or security patrols.
